1	This report makes reference to the following document:		
	D1: US 5 785 493 A (OJIMA KAZUO ET AL) 28 July 1998 (1998-07-28)		
2	Document D1 is considered the closest prior art and discloses (the references between parentheses refer to that document; see the drawings):		
	a turbo-machine having a stator with an internal intake coating (5) and a rotor (3) inside the stator,		
	from which the subject matter of independent claim 1 differs in that:		
	the turbo-machine also has a device for the parallel displacement and rotation of the axis of rotation of the rotor about the axis of symmetry of the stator.		
2.1	The subject matter of claim 1 is thus novel (PCT
